Comorbidités

Figure 2: Disability Prevalence by Age: 1997
(Percent with specified level of disability)

Percentage of people age 65 and over who reported having selected chronic conditions, by sex, 2005–2006

Note: Data are based on a 2-year average from 2005–2006.

Reference population: These data refer to the civilian noninstitutionalized population.

Source: Centers for Disease Control and Prevention, National Center for Health Statistics, National Health Interview Survey.

Comorbidités

Piccirillo JF et al, JAMA 2004

Comorbidités

Table 4 Major Results of Multivariate Analysis for Survival

Characteristics	Median Survival (Months)	P Value
Sex (Women vs. Men)	Not reached vs. 8.5	0.0228
Aged 80-85 Years vs. > 85 Years	12.2 vs. 3.84	0.107
CCI < 6 vs. CCI ≥ 6	12.2 vs. 8.2	0.0775
ECOG PS < 2 vs. PS ≥ 2	12.3 vs. 2.8	< 0.00001
Weight Loss ≥ 5% (No vs. Yes)	12.2 vs. 3.2	0.0457
TNM Stage (I/II vs. IIIA/IIIB vs. IV)	40.2 vs. 12.2 vs. 3.1	< 0.00001

Sole factors with a *P* value < 0.2 are reported.
Abbreviation: ECOG = Eastern Cooperative Oncology Group

Figure 1 Median Overall Survival

Survival of elderly patients with NSCLC according to the CCI, showing a better but nonstatistically significant survival for patients with a lower CCI score (12.2 months vs. 8.2 months; *P* = 0.08).

Breen D, Barlesi F, et al, Clin Lung Cancer 2007

Polymédications

	Country	Number of patients	Age, years	Number of prescribed drugs	Patients taking over-the-counter drugs (%)	Patients taking complementary and alternative medicines (%)
Cashman et al ³	UK	100	Median 73.5 (IQR 65–88)	Median 7 (IQR 1–17)	NR	NR
Puts et al ⁵	Canada	112	Mean 74.2 (SD 6, IQR 65–92)	Median 5 (IQR 3–9)	NR	NR
Hanigan et al ¹²	USA	52	Range 44–85	Mean 5.5 (IQR 0–13)	71%; mean 2.2 drugs (IQR 0–20)	69%; mean 1.9 (IQR 0–11)
Sokol et al ¹³	USA	100	Median 78 (IQR 70–90)	Mean 9.1 (prescribed and over the counter)	NR	~50%
Werneke et al ¹⁴	UK	318	NR	NR	NR	>50%

NR=not reported.

Essais spécifiques

Table 4. Adverse Events

	Age-Unspecified (n = 118)		Elderly-Specific (n = 104)		P
	No.	%	No.	%	
Patients with any grade 3+ event	112	95	63	61	< .001
Patients with any grade 3+ hematologic event	80	68	10	10	< .001
Patients with any grade 3+ nonhematologic event	95	81	59	57	< .001
Patients with grade 3+ neutropenia	66	56	9	9	< .001
Patients with grade 3+ dyspnea	21	18	20	19	.78
Patients with grade 3+ fatigue	30	25	9	9	.001
Patients with grade 3+ leukopenia	47	40	2	2	< .001
Patients with grade 3+ thrombocytopenia	16	14	1	1	< .001
Patients with grade 3+ febrile neutropenia	15	13	1	1	< .001

NOTE. Throughout Table, adverse events are included only if their frequency was $\geq 10\%$ in either group.

Jatoi A, J Clin Oncol 2005

Essais spécifiques

Fig 3. Median survival times in age-unspecified and elderly-specific trials were 302 and 232 days, respectively.

Facteurs pronostiques

- Performance Status
- Scores ADL et IADL
- Etat nutritionnel
- Etat psychologique

Blanco R et al, Ann Oncol 2015

Evaluation Gériatrique Standardisée

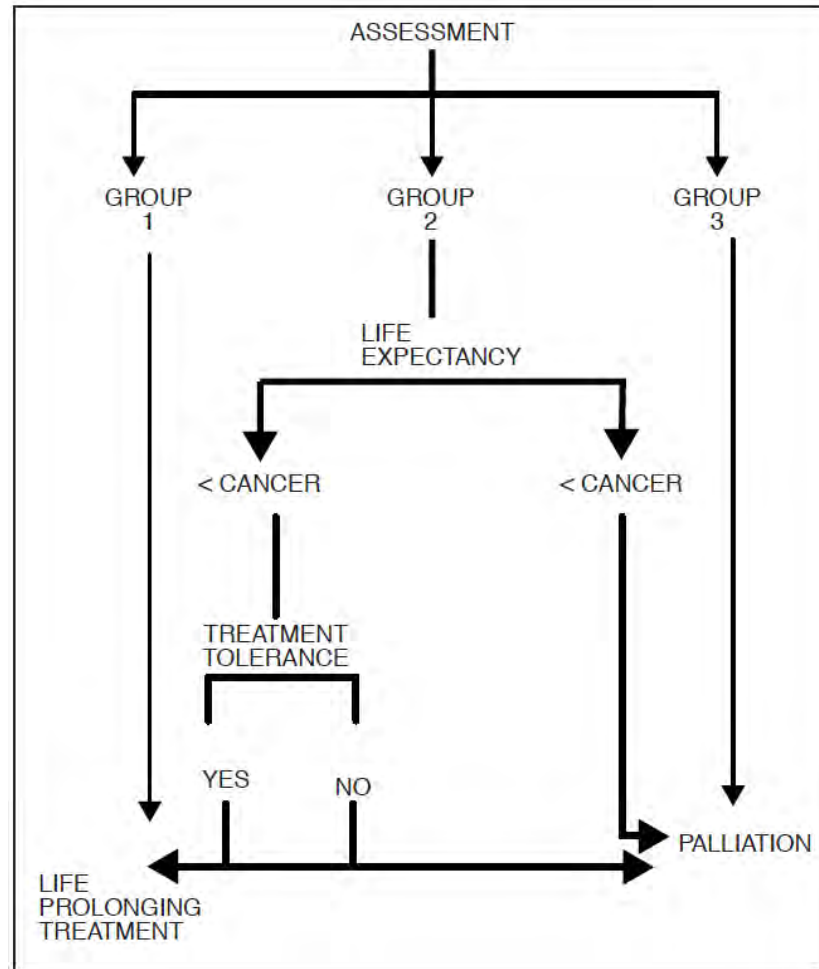

Table 5. Elements of a comprehensive geriatric assessment

Parameter assessed	Elements of the assessment
Function	Performance status ADL IADL
Comorbidity	Number of comorbid conditions Severity of comorbid conditions (comorbidity index)
Socioeconomic conditions	Living conditions Presence and adequacy of a caregiver
Cognition	Folstein's minimal status Other tests
Emotional conditions	Geriatric depression scale (GDS)
Pharmacy	Number of medications Appropriateness of medications Risk of drug interactions
Nutrition	Mini-nutritional assessment (MNA)
Geriatric syndromes	Dementia Delirium Depression Falls Neglect and abuse Spontaneous bone fractures

Balducci L and Extermann M, The Oncologist 2000

Evaluation Gériatrique Standardisée

Balducci L and Extermann M, The Oncologist 2000

Outils Gériatriques de Dépistage

Table 2. Alternative instruments to the comprehensive geriatric assessment (CGA), suggested for use in the initial assessment of the health status of elderly cancer patients

Instrument	Description	Sensitivity/specificity	Reference
Abbreviated CGA	Questionnaire covering ADL, IADL, depression and cognitive impairment	Sensitivity 51% Specificity 97%	Overcash et al. [24, 25] Hamaker et al. [26]
Barber screening letter	Questionnaire covering autonomy, health status, hearing, eyesight and hospitalisation	Sensitivity 59% Specificity 79%	Barber et al. [27] Hamaker et al. [26]
Fried frailty criteria	Questionnaire covering weight loss, fatigue, grip strength, gait speed and physical activity	Sensitivity 31% Specificity 91%	Fairhall et al. [28] Hamaker et al. [26]
Geriatric 8	Questionnaire covering ADL, IADL, depression, cognitive impairment, geriatric illness rating and mobility	Sensitivity 87% Specificity 61%	Bellera et al. [29] Hamaker et al. [26]
Groningen Frailty Index	Questionnaire covering mobility, vision, hearing, nutrition, comorbidity, cognition, psychosocial aspects and physical fitness	Sensitivity 57% Specificity 86%	Schuermans et al. [30] Hamaker et al. [26]
Onco-Geriatric Screening Tool	Questionnaire covering frailty risks	Sensitivity 88% Specificity 44%	Valero et al. [31]
Senior Adult Oncology Program 2	Questionnaire covering availability of caregiving, depression, QoL, ADL, nutrition, sleep and prescription payments	Sensitivity 100% Specificity 40%	Extermann et al. [32]
Triage Risk Screening Tool	Questionnaire covering availability of caregiving, cognitive impairment, ADL, medication use/issues, hospitalisation, nutrition, sensory deficit, incontinence and ability to cope	Sensitivity 92% Specificity 47%	Mion et al. [33] Hamaker et al. [26]
Vulnerable Elders Survey 13	Questionnaire covering age, comparative age-related health and functional status	Sensitivity 68% Specificity 78%	Saliba et al. [34] Hamaker et al. [26]

ADL, activities of daily living; IADL, instrumental activities of daily living; QoL, quality of life.

Blanco R et al, Ann Oncol 2015

Oncodage (G8)

	Items	Score
A	Le patient présente-t-il une perte d'appétit ? A-t-il mangé moins ces 3 derniers mois par manque d'appétit, problèmes digestifs, difficultés de mastication ou de déglutition ?	0 : anorexie sévère 1 : anorexie modérée 2 : pas d'anorexie
B	Perte récente de poids (< 3 mois)	0 : perte de poids > 3 kilos 1 : ne sait pas 2 : perte de poids entre 1 et 3 kilos 3 : pas de perte de poids
C	Motricité	0 : du lit au fauteuil 1 : autonome à l'intérieur 2 : sort du domicile
E	Problèmes neuropsychologiques	0 : démence ou dépression sévère 1 : démence ou dépression modérée 2 : pas de problème psychologique

F	Indice de masse corporelle	0 : IMC < 19 1 : IMC = 19 à IMC < 21 2 : IMC = 21 à IMC < 23 3 : IMC = 23 et > 23
H	Prend plus de 3 médicaments	0 : oui 1 : non
P	Le patient se sent-il en meilleure ou moins bonne santé que la plupart des personnes de son âge	0 : moins bonne 0,5 : ne sait pas 1 : aussi bonne 2 : meilleure
	Âge	0 : > 85 1 : 80-85 2 : <80
SCORE TOTAL		0 - 17

Un score \leq à 14 révèle une vulnérabilité ou une fragilité gériatriques devant conduire à une consultation adaptée.
